MDL Manufacturing Industries, Inc. Offers You Award-Winning Service Since 1989

Senior Challenge Showcase

PSU industrial engineering seniors, Bruce Stone, Kevin Cornwall, Tyler Noda and Adam Colucci, showcased the laser welding project at the Senior Challenge Showcase, hosted by PSU's Learning Factory on December 9, 2010. Their project was one of several selected to be voted on for best in their category.

For the past four months, five PSU senior students worked on a laser welding of various metals project. This could not have been possible without the help of our laser technician, Bruce Frazier, and the guidance of Mr. Doug Lingsch. The five engineering students learned a wide variety of laser welding techniques and laser welded a wide variety of materials. They were also shown the proper safety precautions when working with laser welding processes. The students performed a DOE that minimized the number of samples, but also gave good process resolution.

Kevin Cornwall interviews with Doug Lingsch about the Senior Challenge Project MDL offered to students.

Road to Recovery

Team member Norm Oster's family suffered a tragedy in mid-December when his wife and daughter were struck by a van while in a crosswalk in the early evening. Both mother and daughter suffered debilitating injuries yet are on the road to recovery. For that, we are truly thankful.

Katie is surrounded by well wishes of balloons and stuffed animals while recovering from her injuries.

Employee Spotlight

Raul Carranza is a leader and consistently finds ways to be challenged and to challenge those around him. He has been with us for over six years and has made many contributions to MDL WP, with his many OFI's.

Raul has taken the lead in our 5S implementations and developed inventory controls in the paint department where he was supervisor prior to being promoted to the CNC Machine Department, where he is utilizing his strengths to make the CNC department more efficient.

When implementing the ISO Quality System in White Plains, we needed a Traveler Board. After explaining our need, Raul used materials on hand and his engineering abilities to create a beautiful "board" that fit our needs perfectly. Not only was it practical in its application, but an attractive addition to the shop floor.

With personnel like Raul MDL is able to consistently meet and exceed our customers expectations through employee innovation and excellence.

Raul has won many awards as Employee of the month, has been spotlighted for his contributions, hard work and determination. When a Customer deadline is present I know that we can always rely on Raul and his team to go the extra mile and work around the clock to ensure that our customers are #1 on MDL's priority list.

Did You Know

MDL is about to launch a new laser cutting service? We have three lasers and lights-out operation capabilities. We want to put those machines to good use by providing a 24-hour laser cutting service. Send us your DXF and we will laser cut and send you the parts the next day. We are in the process of developing a web site that customers can upload their files, select the materials and specifications required. Unlike other 24-hour laser cutting services, we are the only service that will provide file uploads from your ready-to-cut DXF drawings. Keep your eyes posted for our launch within the next month.

Save the Date

MDL will be hosting an open house of its new White Plains manufacturing facility in the spring. Plan on joining us for a tour of the manufacturing floor and save room for lunch. Mark your calendars for May 9, 2011 from 1:00 PM to 4:00 PM.
