

The Latest News From MDL Manufacturing

New Year, New Partnerships!

MDL is excited to partner with new companies in various industries going into 2016. Traditionally the majority of our work has been in the defense, construction, and mining industries. In 2016 we will be working closely with new companies in the rail industry as well as new companies in industries we have previously served. We would like to thank all of our current and new customers for a great year in 2015 and we are looking forward to what this year has in store!

Installation Progress

River System

Robotic Press Brake

Blast Cabinet

In the previous newsletter we highlighted our new MC Machinery Laser River System and a new automated press brake from Amada. We plan to have the River System and press brake fully installed and operational by February 1st. The River System will feature two CO₂ lasers and one fiber laser while the automated press brake will feature a robotic arm that can automatically form parts and readjust its grip to form the part from various angles and lengths. In addition to the lasers and press brake, we have a new blast cabinet that houses a 10 ft table. We are expecting this new equipment to streamline our processes and help us get a better product to our customers in the most efficient way possible.

Newsletter & Social Media Updates

As you may have noticed already, the newsletter has undergone a few changes! We have updated the top banner, trimmed down the content, and made the newsletter more easily accessible and will be distributing one every month. Along with newsletter updates we will be actively monitoring and updating our social media pages. Make sure you stay tuned to our YouTube channel, as we will be uploading videos of our new machines as they become operational!

Certifications

ISO 9001:2008
ISO 14001:2004
ITAR

OFI Winners

Homer Griffith, Quirino Rodriguez, and Stacey Claycomb were our OFI (Opportunity For Improvement) winners this month. Their suggestions will help maintain organization and efficiency in the paint and inspection departments. Congrats!
