

## The Latest News From MDL Manufacturing

### MDL Sponsors Local School's First Lego League Team

MDL has teamed up with students in the "First Lego League" at Chestnut Ridge Middle School! The "First Lego League" is an international competition where students build Lego robots to complete certain tasks. The program focuses on programming, engineering, team building, and gives the students an opportunity to use math and science concepts in real life situations. We are always excited to see the next generation interested in robotics and engineering!

### Automated Operations

Over the past few months we have been covering the installation process of both our Laser River System and the Automated Press Brake, and we are now running production parts on the press brake. It has been a great addition to the floor, enabling us to run more parts, more efficiently. We are nearing the end of the installation process for our River System and the new goal is to be fully operational within the next few weeks! Stay tuned to our website and YouTube channel for more updates regarding both of these machines!

### Congressman Bill Shuster Visits MDL

Earlier this month Congressman Bill Shuster visited MDL. We were more than happy to show him our operations and how MDL is changing the face of manufacturing with skilled workers and robotic operations. It is always great to see members in public office interested in manufacturing and the jobs it creates. Manufacturing has

always been a strong sector in the US economy, providing jobs and economic strength in various regions across the country.

### Certifications

ISO 9001:2008  
ISO 14001:2004  
ITAR

### Celebrating 10 Years

In celebration of 10 years with MDL, we presented Joe Ford with a muzzleloader as a token of our appreciation. Thanks, Joe, for all of your hard work and dedication over the years! We truly appreciate it!
